DEPLOYMENT OPTIONS

Option 1: Use NeuralNode Production ★

Connect to existing Polygon deployment:

typescript

```
const BUBBLEROOM = "0x024b464ec595F20040002237680026bf006e8F90";  
const contract = new ethers.Contract(BUBBLEROOM, ABI, provider);
```

Benefits:

-  No deployment needed
-  Verified contracts
-  Live users and data
-  Production tested

Option 2: Deploy Your Own NeuralNode

bash

```
./scripts/deploy-neuralnode.sh  
cd neuralnode  
forge script script/Deploy.s.sol --broadcast
```

Benefits:
